Comment faire ?

Je regarde attentivement la figure pour comprendre les différentes figures qui la composent. J'essaie de la faire à main levée.

Je refais la figure sur une feuille A4 blanche :

⇒ **En CM1** : exactement à la même dimension, en reportant les longueurs nécessaires au compas.

⇒ **En CM2** : en doublant les dimensions (c'est un agrandissement).

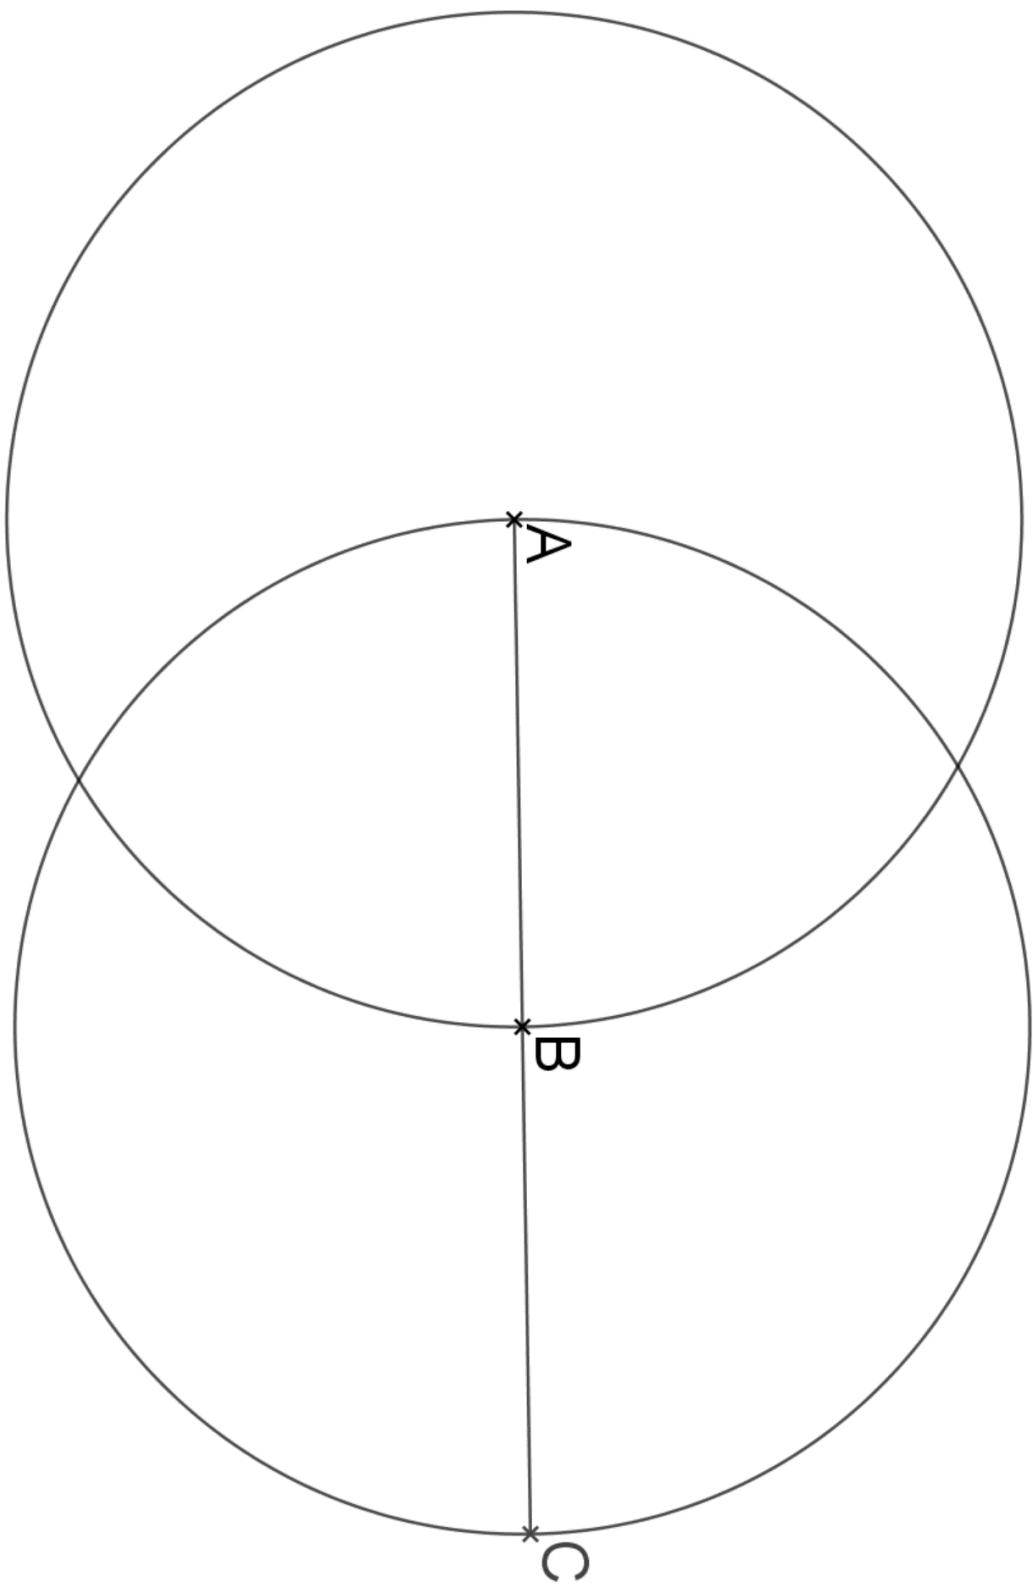

Tous les cercles ont pour centre un des points de la figure.

Je pense à me servir de mon compas pour comparer des longueurs.
