

Les solides : le cube

1) Je découpe le patron du cube et j'essaie de le construire en pliant sur les traits.

## Les solides : le cube

1

Je compte le nombre de sommets, de faces. Je complète la définition.

Nombres de faces : \_\_\_\_\_

Nombre de sommets : \_\_\_\_\_

Nombre d'arêtes : \_\_\_\_\_

Un cube a \_\_\_\_\_ faces, \_\_\_\_\_ sommets et \_\_\_\_\_ arêtes.

Toutes ses faces sont des \_\_\_\_\_.

Les solides : le cube

1 Je retrouve le patron du cube parmi les autres et je l'entoure.

A large rounded rectangular frame containing six different arrangements of squares, each representing a potential net of a cube. The arrangements are:

- Top-left: A vertical column of four squares with one square attached to the top square's top side.
- Top-right: A vertical column of four squares with one square attached to the second square's right side.
- Middle-left: A vertical column of three squares with one square attached to the top square's left side and another square attached to the middle square's left side.
- Middle-right: A vertical column of three squares with one square attached to the top square's right side and another square attached to the middle square's right side.
- Bottom-left: A vertical column of five squares with one square attached to the third square's right side.
- Bottom-right: A vertical column of five squares with one square attached to the third square's left side.
