

# MATHS jeudi 14 mai

## 1 Calcul mental

Table de multiplication x 4: révisions

$5 \times 4 = 20$     $9 \times 4 = 36$     $6 \times 4 = 24$    combien de fois 4 pour faire 32? 8   pour faire 16? 4

Calculer des sommes du type  $50 + 70$

$40 + 70 = 110$     $30 + 80 = 110$     $90 + 40 = 130$     $90 + 90 = 180$

$20 + 80 = 100$     $20 + 90 = 110$     $80 + 30 = 110$     $80 + 80 = 160$

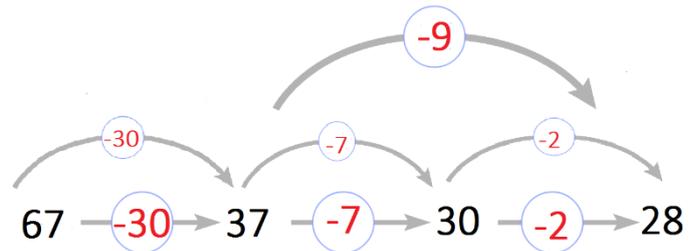

$50 + 80 = 130$     $50 + 90 = 140$     $30 + 70 = 100$     $70 + 70 = 140$

## 2 Calculer en ligne des différences (2<sup>ème</sup> séance)

1) *Calculs*

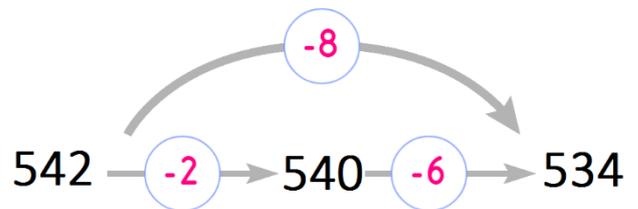

•  $67 - 39 = 67 - 30 - 9 = 37 - 9 = 37 - (7+2) = 37 - 7 - 2 = 30 - 2 = 28$

Procédures visées : On casse 9 en 7+2

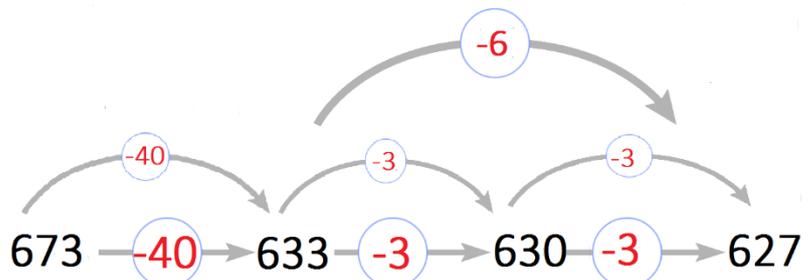

•  $542 - 8 = 542 - (6+2) = 542 - 2 - 6 = 540 - 6 = 534$

Procédures visées : On casse 8 en 2+6

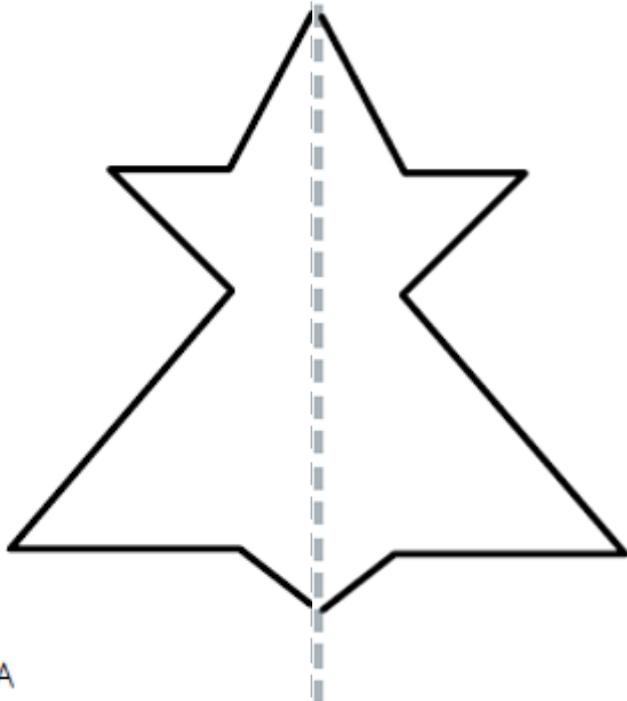

•  $673 - 46 = 673 - 40 - 6 = 633 - 6 = 633 - (3+3) = 633 - 3 - 3 = 630 - 3 = 627$

Procédures visées : On casse 6 en 3+3

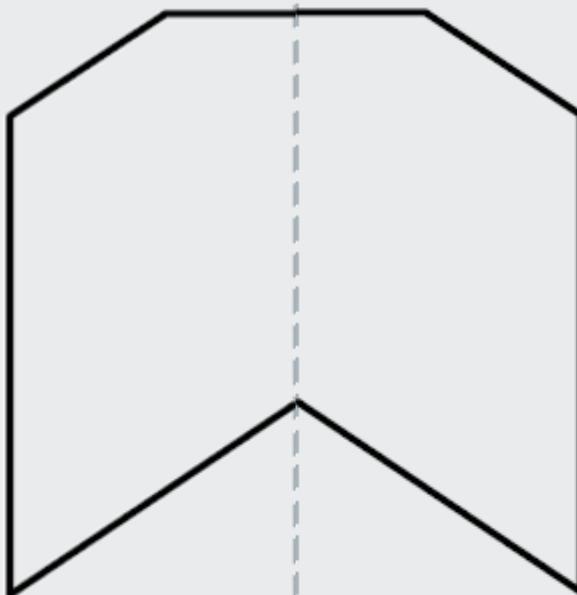

Compléter une figure par symétrie (2ème séance)
