

Conduite à tenir face au risque technologique

Ce qu'il faut faire en cas d'alerte

ALERTE

Une sirène au son modulé :
3 fois 1 minute et
41 secondes,
espacées de 5 secondes

Si vous entendez la sirène, il faut réagir immédiatement

Jusqu'à la fin de l'alerte, respectez impérativement
les consignes données par les autorités

FIN D'ALERTE

Une sirène au son modulé continu de 30 secondes

a. Le Signal National d'Alerte est un signal :

lumineux. sonore. radio.

b. Son rôle est d'alerter la population :

qu'il est l'heure de se coucher. de la fin de l'école. d'un évènement grave.

c. Lorsque l'on entend le Signal National d'Alerte, il faut :

se précipiter dehors. se confiner. téléphoner à ses parents.

d. On sait que l'alerte est terminée quand un son continu dure :

30 secondes. 45 secondes. 3 minutes.

3

Complète ce texte avec les mots suivants : minute – actions – 30 – signe – secondes – information – modulé – 41 – continu.

Légen

Un signal est un , connu de tous, qui donne une , un avertissement à une ou plusieurs personnes, et qui peut indiquer le moment de faire quelque chose.

Il implique donc une ou plusieurs

Le Signal National d'Alerte est un signal sonore

composé de trois séquences d'une et secondes

séparées par des silences de 5 La fin de l'alerte est

un signal sonore de secondes.

3

Imagine à quel type de signal (et sur quel appareil) correspond chaque situation.

• Te rappeler un anniversaire :

.....

.....

• Prévenir les automobilistes qu'un train arrive à l'approche d'un passage à niveau :

.....

.....

• Signaler à des piétons que tu arrives à vélo derrière eux :

.....

.....

• Appeler à l'aide sur un bateau en détresse :

.....

.....

4

Les animaux aussi ont leurs signaux. Observe ces photos : indique quel signal chaque animal donne et ce que ce signal signifie d'après toi.
