

Fiche de calculs n°14 (correction)

$$20 + 7 = 27$$

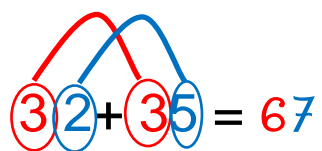

Diagram showing the addition of 32 and 35. A red arch connects the 3 in 32 to the 3 in 35, and a blue arch connects the 2 in 32 to the 5 in 35. The result is 67.

$$32 + 35 = 67$$

$$9 + 50 = 59$$

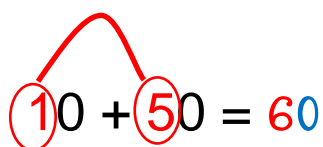

Diagram showing the addition of 10 and 50. A red arch connects the 1 in 10 to the 5 in 50. The result is 60.

$$10 + 50 = 60$$

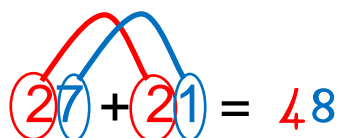

Diagram showing the addition of 27 and 21. A red arch connects the 7 in 27 to the 1 in 21, and a blue arch connects the 2 in 27 to the 2 in 21. The result is 48.

$$27 + 21 = 48$$

$$47 + 3 = 50$$

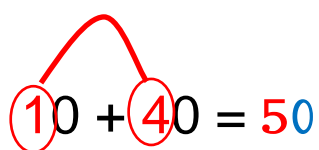

Diagram showing the addition of 10 and 40. A red arch connects the 1 in 10 to the 4 in 40. The result is 50.

$$10 + 40 = 50$$

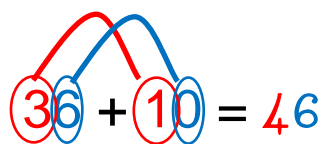

Diagram showing the addition of 36 and 10. A red arch connects the 6 in 36 to the 1 in 10, and a blue arch connects the 3 in 36 to the 0 in 10. The result is 46.

$$36 + 10 = 46$$

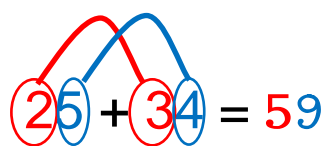

Diagram showing the addition of 25 and 34. A red arch connects the 5 in 25 to the 4 in 34, and a blue arch connects the 2 in 25 to the 3 in 34. The result is 59.

$$25 + 34 = 59$$

$$40 + 5 = 45$$

$$6 - 4 = 2$$

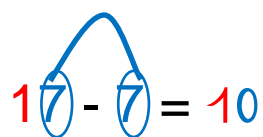

Diagram showing the subtraction of 7 from 17. A blue arch connects the 7 in 17 to the 7 in 7. The result is 10.

$$17 - 7 = 10$$

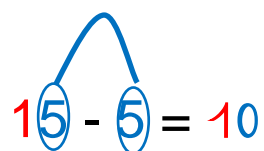

Diagram showing the subtraction of 5 from 15. A blue arch connects the 5 in 15 to the 5 in 5. The result is 10.

$$15 - 5 = 10$$

$$14 - 3 = 11$$

$$20 - 4 = 16$$

$$16 - 2 = 14$$

$$12 - 1 = 11$$

$$28 - 5 = 23$$

$$24 - 3 = 21$$

$$39 - 4 = 35$$
