## Comment faire ?

L'horloge donne l'heure grâce à deux aiguilles. La grande aiguille indique les minutes, la petite aiguille indique les heures.

Il est **4 heures** car la petite aiguille vise le « 4 » et la grande indique le « 12 » qui représente « 0 » minute.

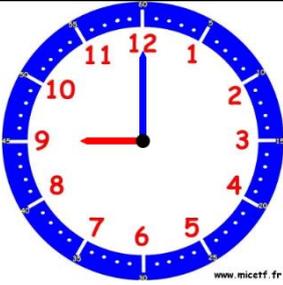

Il est **7h30** car la petite aiguille est après le 7 et avant le 8 et la grande aiguille est sur le 6 qui représente 6 fois 5 minutes, c'est-à-dire 30 minutes (une demi-heure)
